

Food and Beverage Solution

VPOS Restaurant Point of Sale System offers a fully integrated, end-to-end solution, featuring Point-of-Sale, Back Office, Reporting, Inventory, Attendance & Payroll management and loyalty programs. With this industry-proven product solution, you can implement best-of-breed technology in every area of your restaurant operations while minimizing the cost, time and risk associated with technology implementation. Benefit from seamless integration between solution components and the efficiency of having a single solutions provider for all your restaurant technology needs. Today's restaurants are demanding additional flexibility from their point-of-sale software. Intuitive order entry, manager operations, and basic reporting aren't enough. VPOS restaurant Point of Sale system is a Windows-based, touch-screen system, designed to increase the operating efficiency of a food service business. It gives you a solution for every food service mode like Dine in Table, Quick order and Take Away services.

Wireless Mobile PDA Ordering

Turn tables faster due to more efficient service
Quick easy to use menu choices, with no limit to the amount of menu items
Full and complete menus including programmable modifiers per menu item
Increase amount of time servers can spend checking on customers, not running to and from busy input stations
Specially designed main menu tells servers at a glance their customers' status.

Inventory for Recipe, Ingredient and Food Costing

From recipe costing to stock depletion and period costs, the software accurately reflects precisely what it costs to provide food to your customers. It is directly linked to the program on the POS and depletes from stock on a FIFO basis, (first in, first out), and includes all aspects that affect your cost. We set-up the system initially, you add your suppliers, their products and what ingredients you use, in what recipes and where they are stocked. Every item you sell can be counted, ordered through a supplier by fax, email or letter, added into recipes and then depleted from stock every count period.
